(54) Title: SURFACTANT COMPOSITIONS**(57) Abstract**

A stable aqueous foaming surfactant dispersions comprise from 5 to 50 weight % of a surfactant composition comprising at least one foaming surfactant, at least one fatty amphiphile and optionally at least one hydrocolloid; and from 50 to 95 weight % of water and/or at least one foaming surfactant, particularly including at least one anionic surfactant, at least one fatty amphiphile and optionally at least one hydrocolloid, the dispersion also including emulsified therein at least one emollient. Such formulations are particularly useful in the manufacture of 2-in-1 formulations including emollients and/or similar materials. Methods are described for making surfactant formulations especially 2-in-1 formulations particularly using a pre-formed solid blend of foaming surfactant, at least one fatty amphiphile and hydrocolloid.

INTERNATIONAL PRELIMINARY EXAMINATION REPORT

I. Basis of the report

1. This report has been drawn up on the basis of (Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to the report since they do not contain amendments.):

☒ the international application as originally filed.

☐ the description, pages _____, as originally filed,
pages _____, filed with the demand,
pages _____, filed with the letter of _____,
pages _____, filed with the letter of _____.

☐ the claims, Nos. _____, as originally filed,
Nos. _____, as amended under Article 19,
Nos. _____, filed with the demand,
Nos. _____, filed with the letter of _____,
Nos. _____, filed with the letter of _____.

☐ the drawings, sheets/fig _____, as originally filed,
sheets/fig _____, filed with the demand,
sheets/fig _____, filed with the letter of _____,
sheets/fig _____, filed with the letter of _____.

2. The amendments have resulted in the cancellation of:

☐ the description, pages _____.
☐ the claims, Nos. _____.
☐ the drawings, sheets/fig _____.

3. ☐ This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed (Rule 70.2(c)):

4. Additional observations, if necessary:

The claims filed as "possible revised claims" with letter of 06.11.96 have not been considered as request to replace the claims as filed.

III. Non-establishment of opinion with regard to novelty, inventive step and industrial applicability

The questions whether the claimed invention appears to be novel, to involve an inventive step (to be non-obvious), or to be industrially applicable have not been and will not be examined in respect of:

☒ the entire international application,

☐ claims Nos. _____

because:

☐ the said international application, or the said claims Nos. _____ relate to the following subject matter which does not require an international preliminary examination (specify):

☒ the description, claims or drawings (indicate particular elements below) or said claims Nos. _____ are so unclear that no meaningful opinion could be formed (specify):

The various definitions of the invention given in independent claims 1, 2, 6, 7, 18 and 19 are such that the claims as a whole are not clear and concise, contrary to Article 6 PCT. The claims should be recast to include only the minimum necessary number of independent claims in any one category with dependent claims as appropriate.

A requirement of Article 6 PCT is that the claims shall be concise. The requirement of conciseness refers to the claims in their entirety as well as to the individual case. Several independent claims of one category may not conflict the requirements of conciseness if its appropriate. Whether it is appropriate or not should be based on technical questions. In the present case there are no technical issues responsible for several independent claims in one category (e.g. an invention could lie in an improvement of two separate but interrelated articles which may be sold separately, but each carry out the same inventive idea).
